

# Research USAID Approaches to Innovative Engineering

Project Title	Research USAID Approaches to Innovative Engineering
Project Summary	Research assistant to compile development information relevant to engineering and disaster assistance.
Country	United States

## Project Description

I am looking for assistance compiling a publication and PowerPoint presentation titled USAID Approaches to Engineering for Development and Disaster Relief, which will detail examples of how USAID approaches aid from an engineering and disaster relief lens. We will gather information from different USAID websites and other internal and external sources. The goal is to include numerous examples of programs at USAID (or outcomes of programs) that have funded support for innovative solutions to water, sanitation, health, infrastructure, housing, agriculture, and other development challenges.

## Required Skills or Interests

### Skill(s)

Editing and proofreading

Infographic design

Research

Writing

## Additional Information

The work completed will be presented at the National Academy of Engineers conference at MIT. Looking for someone who can work collaboratively, takes initiative, has a positive attitude, and has good communication skills.

Knowledge of Power Point, Microsoft Word and Excel, and various search engines a plus.
